

## Kreativ Dental Clinic Disclaimer

By making an appointment with Kreativ Dental you are agreeing to accept the terms and conditions of this appointment process

No recommended dental treatment is confirmed until your first x-ray and consultation by a Kreativ Dental clinic dentist.

During your consultation(s), our medical professionals will explain to you in detail how a particular procedure applies to your individual circumstances as determined by current x-ray and direct examination completed by Kreativ Dental. The diagnosis and recommendations of our dental specialist(s) as defined in a 'treatment plan' may vary from other diagnoses and recommendations you may have received from a dental provider not affiliated with Kreativ Dental.

Failure to provide relevant medical history and information on medication that could impact dental treatment may affect the ability to initiate or complete dental treatment. Patients should check with their general practitioner (GP) for approval to travel for dental care. Some medical conditions could impact or delay initiation of your treatment. Examples include but are not limited to blood thinning medication.

In some cases the treatment plan may change or vary from the original treatment plan, and/or the treatment phase may vary because new pathology has been diagnosed on a return phase of treatment. A new diagnosis impacting treatment time and cost would require a new treatment plan. This may influence the anticipated treatment time. Kreativ Dental is not liable for changed flights, modified hotels or any associated treatment or travel costs affiliated with this.

Kreativ Dental is a medical care facility and will make every effort to accommodate the patient. Kreativ Dental also reserves the right to change or modify an established appointment time. It is the patient's responsibility to provide a contact number or

## Kreativ Dental Clinic Disclaimer

email address so we can contact you if required. Kreativ Dental may not be able to modify the dental schedule to accommodate patient leisure activities. Kreativ Dental cannot be responsible if the patient is not reachable by phone, EM or SMS with return confirmation and if a missed appointment change delays treatment. Please ensure your contact details are correct during the registration and appointment process.

### **MEDICATION**

Please bring an adequate supply of both prescribed and non-prescribed medication for the duration of your visit at Kreativ Dental. This includes medication taken routinely or as needed. Your visit may require additional days. \*Please bring an additional 7 days (suggested) of medication for this purpose and possible loss of medication while in Budapest. Medication names and dosages of many countries are different, even if they contain the same active substance or ingredients. Over the counter medications common in many countries also may not be available in Hungary. Kreativ Dental is unable to order medication for you. Kreativ Dental will provide all medication related to your dental treatment.

### **FOREIGN IMPLANTS** - *Implants not placed at Kreativ Dental*

You *may* have an implant not placed by Kreativ Dental. If you are visiting Kreativ Dental for a crown placement / replacement on an existing foreign implant, it is necessary for our dentists to know the implant details - product(s), size and placement date of the implant(s) - prior to your visit should any materials require ordering. Please provide the details to your scheduling agent to include in your clinical records. Failure to do so may delay treatment if we have determined prior to your visit, additional product pieces require ordering. If you are a new patient traveling specifically for finalizing implant treatment initiated by another

dentist, your additional implant equipment can only be ordered after a direct examination and signed treatment plan.

After your initial Kreativ Dental x-ray and examination, our findings may determine the implant seems well integrated and the surrounding bone is sound. We may inform you we cannot give a guarantee on the prosthetic work to be carried out on this implant even if the implant type and size (implant details) are made available to us.

Despite our greatest caution and professional experience it can happen that when the existing prosthetic work (e.g. crown, bridge) is removed the implant and/or the abutment can become damaged which can mean that even the implant itself must be removed. The cost of the parts (healing screw/abutment, impression cap, technical analogue, abutment, screwdriver, torque wrench, delivery costs) required to complete the prosthetic work on your implant, if it is not a brand and type that we use, is added to your treatment plan. The procurement of the above mentioned parts can sometimes take a long time, therefore before starting to prepare the planned prosthetic work it is necessary to check and agree with us on the expected timeframe for starting treatment. We thank you for your kind understanding.

### **ANTICOAGULANTS**

At the point of carrying out certain dental, periodontal and oral surgical procedures the process of treatment and its results can be negatively impacted if the patient is taking anticoagulant medication or blood thinner. This can sometimes cause prolonged coagulation, undesired post-operative bleeding and complications. At the same time, to arbitrarily stop taking this medication without asking your treating doctor or obtaining his/her authorization can lead to life-threatening complications.

## Kreativ Dental Clinic Disclaimer

Therefore we kindly ask you to inform your treating doctor you are planning dental, periodontal and oral surgical procedures. Certain indications after direct examination may require we ask you to change your anticoagulant medication over to a medication which allows us to carry out the planned procedure or treatment.

### **Please discuss your medication with your treating doctor**

For example, if you take any of the following medications they may fall under this category. Please discuss this with your treating doctor at home prior to booking for travel to Kreativ Dental.

#### The anticoagulant medication's name and active substance:

- Albyl E (Acetyl salicylic acid)
- Plavix (clopidogrel)
- Marevan (warfarin)
- Syncumar (acenocumarol)
- Xarelto (rivaroxaban)
- Pradaxa (dabigatran etexilat)
- Eliquis (apixaban)
